Class Website: _____

Introduction

Science 10 is an integrated academic course that helps students better understand and apply the fundamental concepts and skills that are common to **biology, chemistry, physics, and earth science**. It is a prerequisite for the 20-level science courses.

The Science 10 program places students at the centre. You will be expected to become an active learner and assume increased responsibility for your learning as you work through the program. You will be expected to participate actively in your own learning with your teacher acting as a guide.

Prerequisite:

Science 9 (recommended mark of 65%+)

Note: it is also recommended you have a math mark of 65%+

Textbook:

Science 10 – Addison Wesley

Assessment: Your grade for the course is broken down as follows:

Unit A: Chemistry

Assignments/Quizzes/Labs6%
Unit Test10%

Unit B: Physics

Assignments/Quizzes/Labs6%
Unit Test10%

Unit C: Biology

Assignments/Quizzes/Labs6%
Unit Test10%

Unit D: Energy Flow & Climate

Assignments/Quizzes/Labs6%
Unit Test10%

Projects.....6%

Final Exam30%

TOTAL.....100%

Tips for Being Successful in Science 10

A vertical stack of seven identical, empty, elongated arrow-shaped boxes pointing to the right. Each box is designed for writing a tip. The boxes are arranged in a column, with each box starting slightly to the left of the one above it, creating a staggered effect. The boxes are empty and have a simple black outline.
